## COMPANY RECRUITMENT TEAM

HO CHI MINH CITY

Dear Recruitment Team,

### About Me

---

I am a third-year student pursuing a Bachelor of Information Technology at Nguyen Tat Thanh University, expected to graduate in August 2025. My academic journey has equipped me with a strong foundation in software development, focusing on both backend and frontend technologies. I have hands-on experience with Java, Spring Boot, React, and Next.js, as demonstrated in my personal projects like *MH Cinema*—a movie ticket booking platform—and *LTH Store*, an e-commerce website for footwear. These projects allowed me to develop RESTful APIs, integrate payment gateways like VNPay and PayPal, and enhance user experiences with modern frameworks like Chakra UI and Tailwind CSS. Additionally, I have participated in extracurricular activities such as the Google Solution Challenge and Hackathon Vietnam with my project *SignChat*, which further honed my teamwork and problem-solving skills.

### Why Me?

---

I am a proactive learner with a passion for technology and a proven track record of delivering impactful projects. My experience in developing full-stack applications, managing databases like MySQL and Azure, and deploying solutions on platforms like Azure and Vercel demonstrates my technical capabilities. Beyond technical skills, my participation in hackathons and collaborative projects has strengthened my ability to work in teams and adapt to challenges. I believe my enthusiasm, technical expertise, and eagerness to learn make me a strong fit for DKSH's internship program. I am excited to contribute to your team while gaining valuable insights into the business world.

I look forward to hearing from you and thank you for considering my application.

Sincerely,

**Vo Minh Hieu**
